RE: CURRENT COST ESTIMATES - SITE CHARLIE

DATE: JUNE 6, 1953

Kars

In a memorandum from W. W. Schmidt to L. A. Silleran, dated June 2, 1953, concerning the transmittal of Current Cost Estimates, there is brought to our attention the fact that the Current Cost Estimates submitted in three specific instances carried an incorrect Engineering Work Order number. The specific cases involved were as follows:

The estimate for the truck and trailer guard indicated L.W.O. 3081, when it should have been L.W.O. 3080.

The estimate for 4-1/2 fents on Charlie indicated L.W.O. 3081, when it should have been L.W.O. 3083.

The estimate for the house and first Aid building on Charlie indicated L.W.O. 3081, when it should have been L.W.O. 3084.

Inasmuch as the estimate in each of these cases was prepared at the jobsite, will you please correct your field notes and records as indicated above. We shall make this same correction on all estimates we have in the home office. I do not feel this is of sufficient importance to call this situation to the attention of our Clients; however, our jobsite and home office records should be corrected in order to prevent any inaccuracies in the collection of costs on these three jobs.
