**REPORTS**

Lt. General Warren D. Johnson, USAF  
Director, Defense Nuclear Agency  
Washington, D. C. 20305

Dear Don:

Our readiness people have asked me to pass on to you this picture of our radiological survey of Enewetak. It evokes in my mind many good memories of my days at Enewetak during the first nuclear tests there in 1948.

I regret my impending reassignment will not let me accompany the Chairman and you on your visit to Enewetak early next year. I wish you a successful trip and even more so a successful conclusion to our efforts to clean up Enewetak and return it to the Enewetakese.

Sincerely,

(signed)  
Frank A. Camm
