David L. Narver, Jr. Building 347 - Elmer

February 3, 1953

WLO
R DN

As per a request in Mr. P. W. Spain's letter PG-2-1528, you are to review the scheme presented on our drawing 5201-EE-2 for Infiltration Lines, Building 347 to see if a less-expensive satisfactory method is possible.

The proposed plan was turned down due to lack of funds, so one solution would be to build only a portion of the infiltration lines at this time. This would be possible because Building 347 will not be used to capacity until the GMR Area is reactivated.

Action on FRE-6472 is being held in abeyance pending the decision on the above. Please inform home office Operations of the field's proposal after consideration has been given to the above.

We are transmitting herewith two prints and one transparency of the following drawing:

5201-EE-2 Bldg. 347 - Elmer, Plan & Details - Infiltration Lines
