Mr. William A. Bonnet, Manager
United States Atomic Energy Commission
Honolulu Area Office
P. O. Box 580
Honolulu, Hawaii 96809

Dear Mr. Bonnet:

The 1968 Rongelap medical survey is about completed. The only item of work remaining is to mothball the outboard boat and motor which is being presently done. The boat is out of the water but due to our workload in our Marine Department it will not be completed till this coming week. When this is completed I will inform you as that should be the last charges to the account.

The matter of the Rongelap people that will have to go to Brookhaven for surgery I am aware of and Dr. Conrad indicated he would make your office aware of it also. I will inform you when the people will be processed.

Enclosed find a cashiers check payable to Holmes and Narver Pacific Test Division. This money is for fares that was collected by the Trust Territory for their people that flew to Majuro on the AEC Army charter and should be credited to the BIO medical account.

I was real pleased that the survey went off as well as it did and would like to take this opportunity to thank your office especially Bill Streenan for the fine support we got in coordinating responsibilities between Honolulu and Kwajalein.

If there are any other requirements needed here from Kwajalein don't hesitate to call upon me and will look forward to handling the surveys in the future.

Sincerely,

Frank J. Granich
Project Manager
