Re: Trench - Dog to Fox

March 20, 1953

Mr. P. W. Spain today informed me that the estimated cost of the trench mentioned in letter PG-4-1662 dated March 5, 1953 has a low priority unless he indicates otherwise at a future date.

For this reason, I have informed the office that the priority for a survey in regard to the trench project is lower than the triangulation project.

David L. Narver, Jr.
Project Engineer
